When a foreigner, who doesn't speak Turkish, lives in Istanbul, the life can be pretty hard. But in case this person needs medical care, and your family is not around, and nobody understand your needs in any hospital - life can be very difficult.

I went in Medipol after 2 months of unsuccessful treatments in other hospitals.

Sibel was my personal assistant, speaking my mother language. She met me on the first day at the reception desk. With smile, understanding, care and professionalism, she helped me so much. She was explaining all details for my medical conditions in different cabinets and I received proper treatment.

To have personal assistant was the first nice surprise in Medipol.

The second one was the care, interest and efforts which the doctors showed to me.

Providing personal attention, following in details my improvement, minimizing all risks for my health - this is ~~what~~ the way they treated me and I am very grateful.

At the end I would like to mention for the excellent medical equipment in the hospital.

Thank you Sibel Kerim

Thank you doc Mehmet Agirman

doc Ali Saibe Engin

Thank you Medipol!

Now I can continue my life with a smile.
